

Senior Health Checklist: Dog

Dogs enter their senior years at approximately 8 years of age (or 6 years of age for large breed dogs (over 25kg)) and health problems become more common. In general, the earlier a problem is detected, the better the chances of us managing the problem successfully. Please fill out this questionnaire to help us provide your dog with the best possible care.

Please complete the following checklist for your dog's appointment.

Dog's name:

Date:

Age:

Breed:

(✓) Please check all that apply to your dog:
